

## Why Making Milestones?

We understand everyone has their own unique mix of strengths, needs and challenges. That's why Making Milestones provides a specialised, fun, and engaging service to support all areas of children's development.

We provide a happy and engaging environment with skilled, caring staff and extensive child friendly resources. We will engage your child through movement, fun interactions and use of all their senses. We will help them develop social, emotional, and motor skills, communication and learning through a personalised approach, tailored for each client and their family.

## What can Making Milestones offer your family?

Our team of dedicated occupational therapists, speech pathologists, dietitians, and psychologists assess and treat most childhood developmental concerns. Our team work together to provide a comprehensive multi-disciplinary service to best meet the needs of you and your child.

As well as individual therapy, we can also offer a range of group programs in our bright, colourful, purpose-built therapy spaces. As well as services in our well-resourced clinic we can also provide services in schools, preschools, and childcare settings.

## Speech Pathology

Our skilled and experienced speech pathologists support children and adults to communicate more effectively by supporting speech, language, social communication, and literacy development. They also support the development of safe eating and a wider range of food choices.

## Support for Children with Sensory and Behavioural Challenges

Our multi-disciplinary team of professionals can help support parents dealing with their child's sensory and behavioral challenges including those related to ASD and other developmental conditions.

## Occupational Therapy

Our occupational therapists can help children and adults develop fine and gross motor skills, independence with activities of daily living, sensory and emotional regulation, play, handwriting, school readiness and attention skills.

## Our Clinical Team

Our clinicians work with developmental challenges including global developmental delay, autism, intellectual disabilities, learning disabilities, speech and language disorders, motor, and sensory challenges.

## Dietetics

Our paediatric dietician can support you to provide nutrition for your child's optimal growth and development, address food allergies and intolerances, support you to overcome feeding challenges and create positive mealtime experiences.

## Psychology

Our psychologists support healthy emotional wellbeing by developing trusting relationships and allowing safe and confidential self expression. This supports personal development and resilience which can help manage and prevent behavioral issues, anxiety, and depression.

We can also support parents with the daily challenges of raising children.

Striving to help  
each child reach their  
full potential

## Groups and Workshops

Groups provide a fun, engaging and cost-effective way for children to develop a range of important skills. Our workshops are designed by our trained professionals to help children develop communication, motor, sensory, cognitive, and social skills.

Our group and workshop programs will grow and develop based on the needs of the families we support. They include Playgroup and Sensory Playgroup for children aged 0 to 5 years. Visit our website to see our current group program.
